## 1. How to install the Metamask browser extension

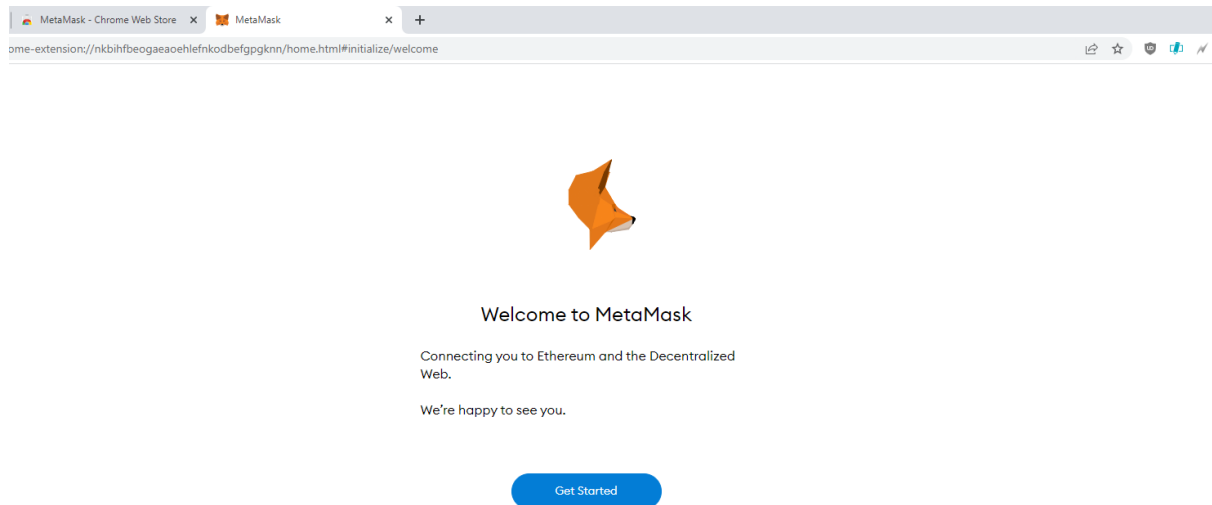

First you should search metamask.io and click the download option, select which platform you'd like to download it on and it will redirect you to the chosen platform. In our case we used chrome.

You will be redirected to the chrome webstore which will give you the option to add metamask to your chrome browser.

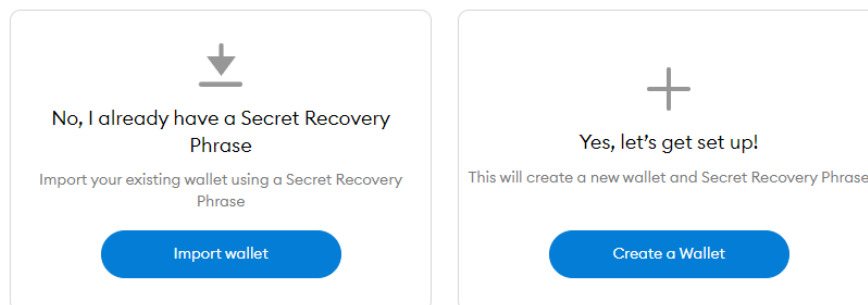

## 2. How to create a MetaMask wallet

Select get started.

### New to MetaMask?

To set up a metamask wallet you will need to select “create a wallet”, once this is selected you will be directed to a page to choose your preferences if you would like to improve metamask or not. This option is not overly important as seen in the following screenshot.

## Help us improve MetaMask

MetaMask would like to gather usage data to better understand how our users interact with the extension. This data will be used to continually improve the usability and user experience of our product and the Ethereum ecosystem.

MetaMask will..

- ✓ Always allow you to opt-out via Settings
- ✓ Send anonymized click & pageview events

- ✗ **Never** collect keys, addresses, transactions, balances, hashes, or any personal information
- ✗ **Never** collect your full IP address
- ✗ **Never** sell data for profit. Ever!

No Thanks

I Agree

This data is aggregated and is therefore anonymous for the purposes of General Data Protection Regulation (EU) 2016/679. For more information in relation to our privacy practices, please see our [Privacy Policy here](#).

Click either “I Agree” or “No Thanks” depending on what preferences you would like. This will then allow you to proceed with setting up your wallet.

< Back

## Create Password

New password (min 8 chars)

.....

Confirm password

.....

I have read and agree to the [Terms of Use](#)

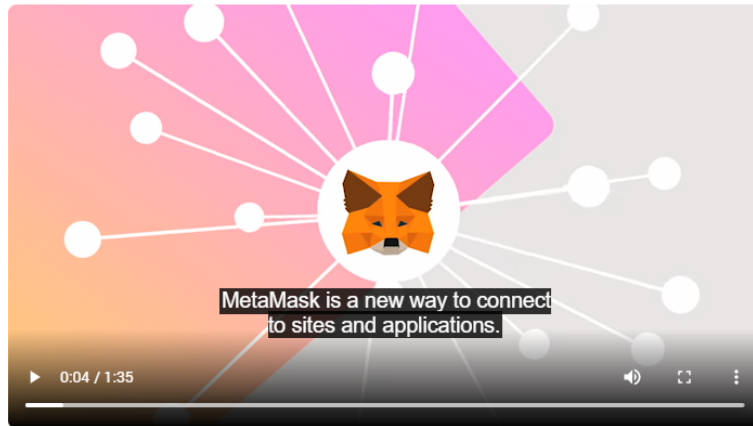

Create

You are then prompted to create a password for your wallet, this must be a safe password to avoid anyone obtaining access other than the owner of the wallet.

## Secure your wallet

Before getting started, watch this short video to learn about your Secret Recovery Phrase and how to keep your wallet safe.

Next

### What is a Secret Recovery Phrase?

Your Secret Recovery Phrase is a 12-word phrase that is the “master key” to your wallet and your funds

### How do I save my Secret Recovery Phrase?

- Save in a password manager
- Store in a bank vault.
- Store in a safe-deposit box.
- Write down and store in multiple secret places.

### Should I share my Secret Recovery Phrase?

Never, ever share your Secret Recovery Phrase, not even with MetaMask!

If someone asks for your recovery phrase they are likely trying to scam you and steal your wallet funds

Once a suitable password is created, the site will provide a tutorial on how to complete the next phase of creating a metamask wallet.

# Secret Recovery Phrase

Your Secret Recovery Phrase makes it easy to back up and restore your account.

**WARNING:** Never disclose your Secret Recovery Phrase. Anyone with this phrase can take your Ether forever.

pear soul update flip destroy tiger  
famous canyon able hard inner what

Remind me later

Next

Tips:

Store this phrase in a password manager like 1Password.

Write this phrase on a piece of paper and store in a secure location. If you want even more security, write it down on multiple pieces of paper and store each in 2 - 3 different locations.

Memorize this phrase.

[Download this Secret Recovery Phrase and keep it stored safely on an external encrypted hard drive or storage medium.](#)

The next step consists of receiving a recovery phrase where it is advised you take note of this on a physical piece of paper so that it cannot be traced online. This is very important for the next step in the set up process.

## Confirm your Secret Recovery Phrase

Please select each phrase in order to make sure it is correct.

able canyon destroy famous  
flip hard inner pear  
soul tiger update what

Confirm

## Confirm your Secret Recovery Phrase

Please select each phrase in order to make sure it is correct.

pear soul update flip  
destroy tiger famous canyon  
able hard inner what

able canyon destroy famous

flip hard inner pear

soul tiger update what

Confirm

Once you click “Next” in the previous step, you will be prompted to rewrite the secret recovery phrase in the same order that it was given, this is why it is crucial that you make a note of it before proceeding.

## Congratulations

You passed the test - keep your Secret Recovery Phrase safe, it's your responsibility!

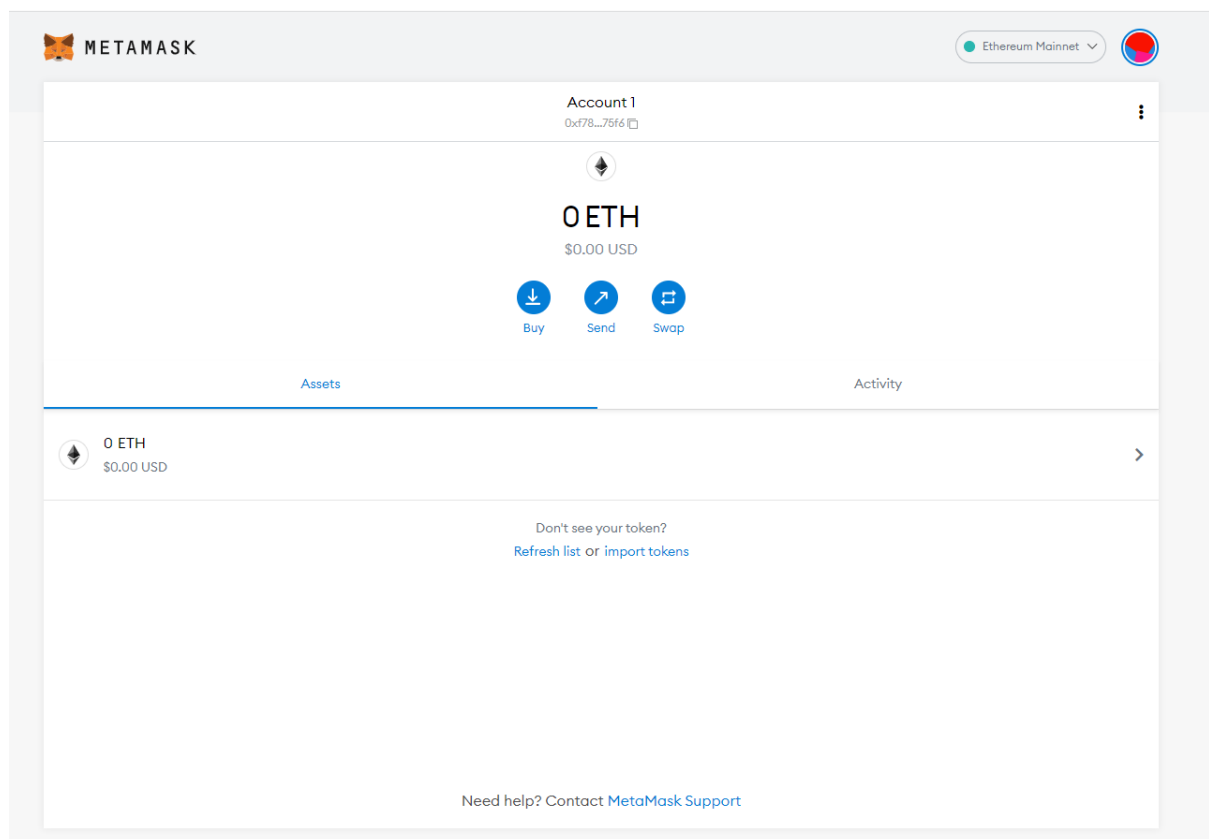

### Tips on storing it safely

- Save a backup in multiple places.
- Never share the phrase with anyone.
- Be careful of phishing! MetaMask will never spontaneously ask for your Secret Recovery Phrase.
- If you need to back up your Secret Recovery Phrase again, you can find it in Settings -> Security.
- If you ever have questions or see something fishy, contact our support [here](#).

\*MetaMask cannot recover your Secret Recovery Phrase. [Learn more](#).

All Done

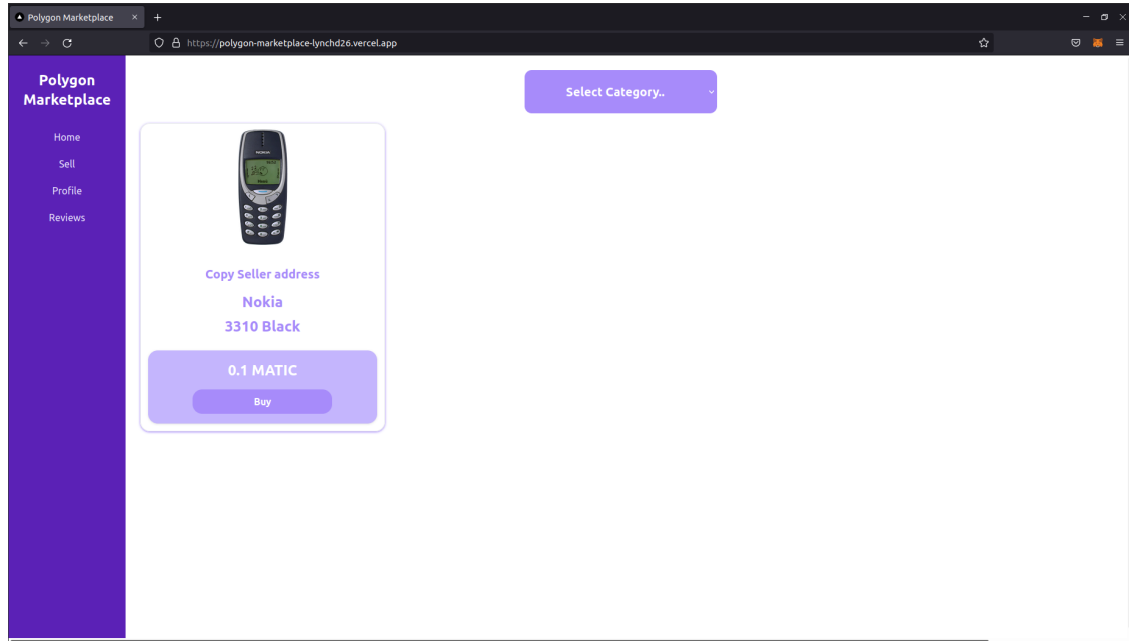

Once you have successfully confirmed the correct secret security phrase, the metamask wallet is then created and you will be able to access your wallet. As shown in the next screenshot.

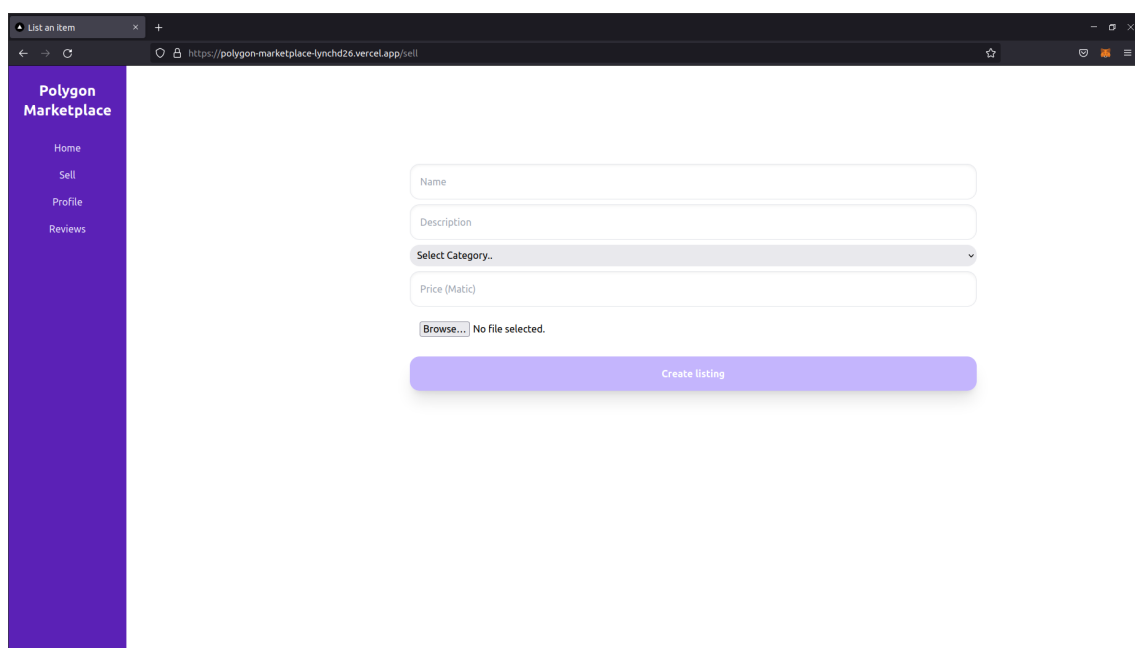

### 3. How to navigate the website

The different pages of the site can be accessed using the sidebar. 'Home' will bring you to the homepage where you can view items that are listed for sale and purchase listings.

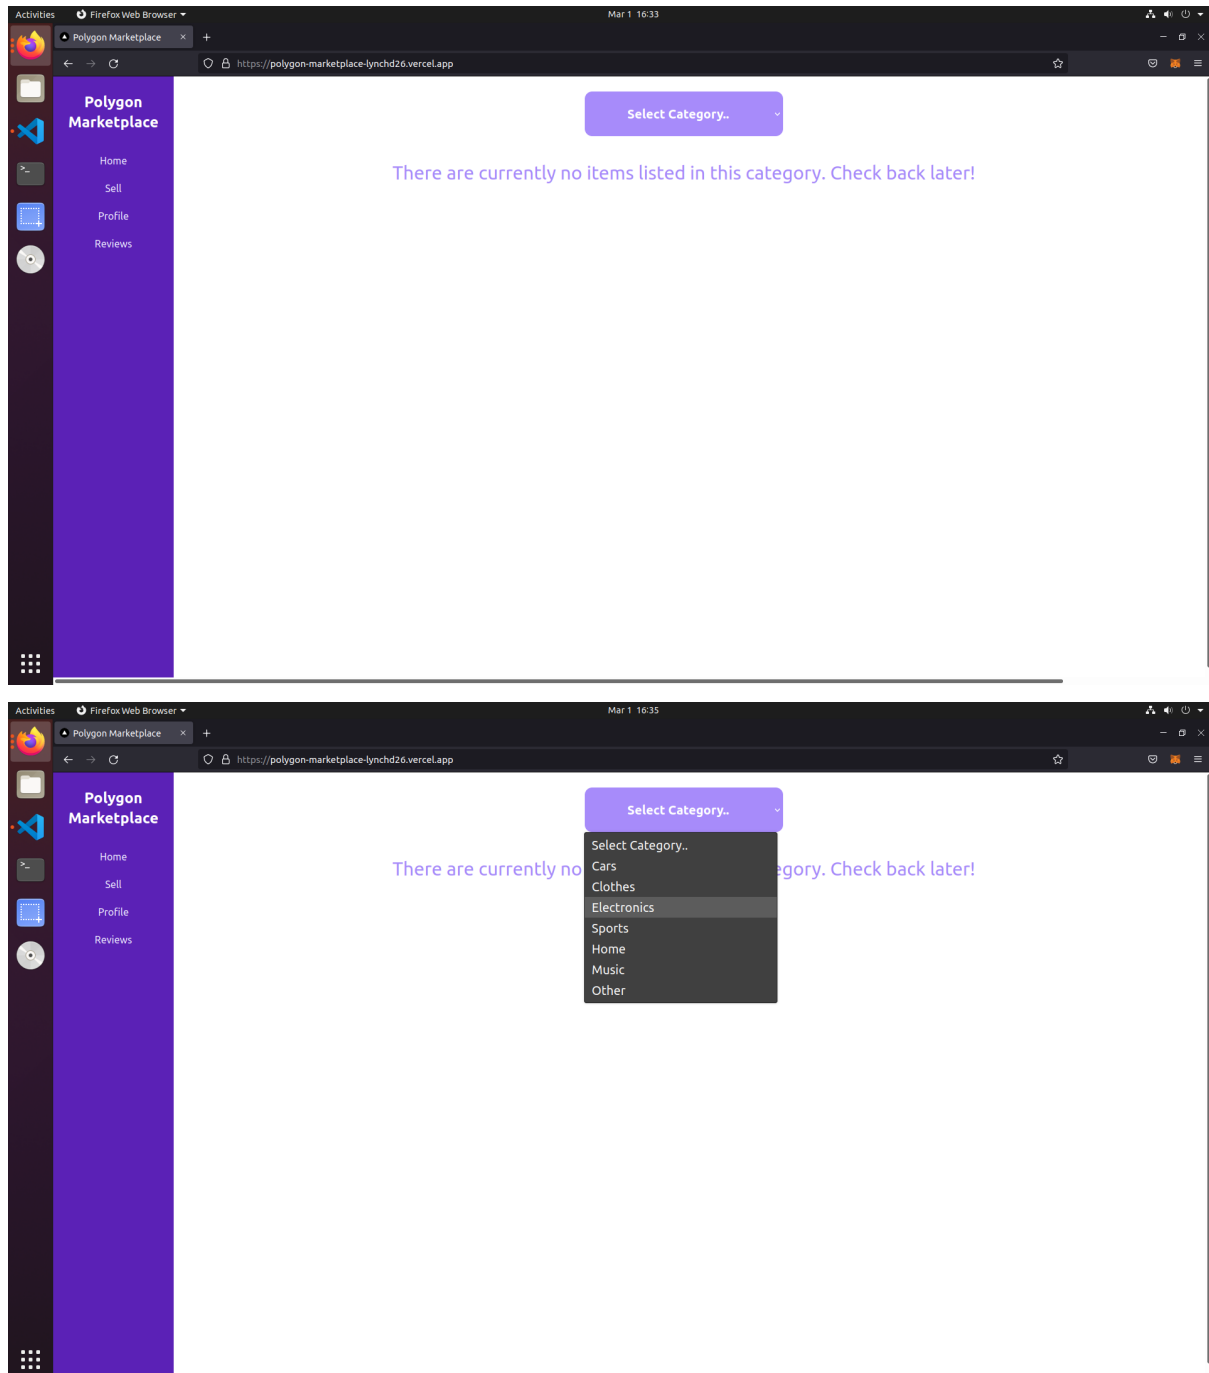

Clicking 'Sell' on the navigation sidebar brings you to the page shown below. Here see the different fields required when you list an item as well as the button to upload an image for your listing. After clicking 'Create Listing' and completing the transaction in your Metamask wallet your item will be listed for sale and available for purchase.

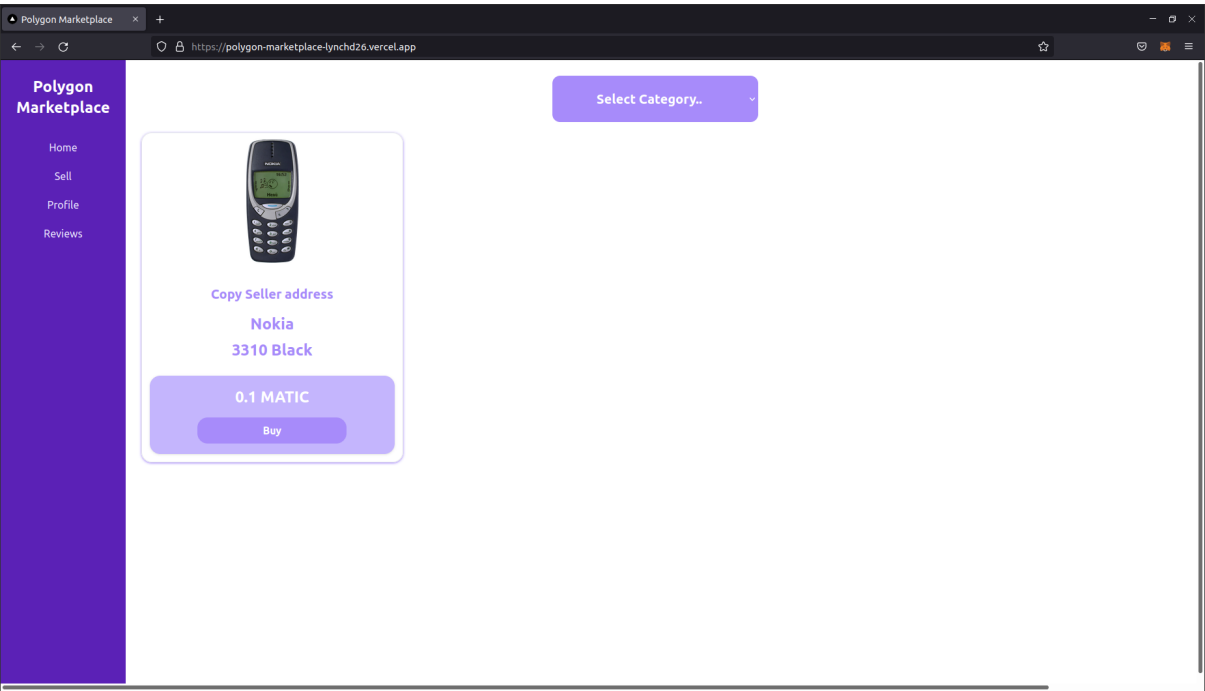

## 4. Viewing the items for sale

When you go to the home page which can be accessed by clicking '*Home*' on the sidebar or on '*Polygon Marketplace*', you are met with the screen shown below. You can view items by clicking on the '*Select Category*' dropdown. If there are no listings available for that category the message below will be displayed.

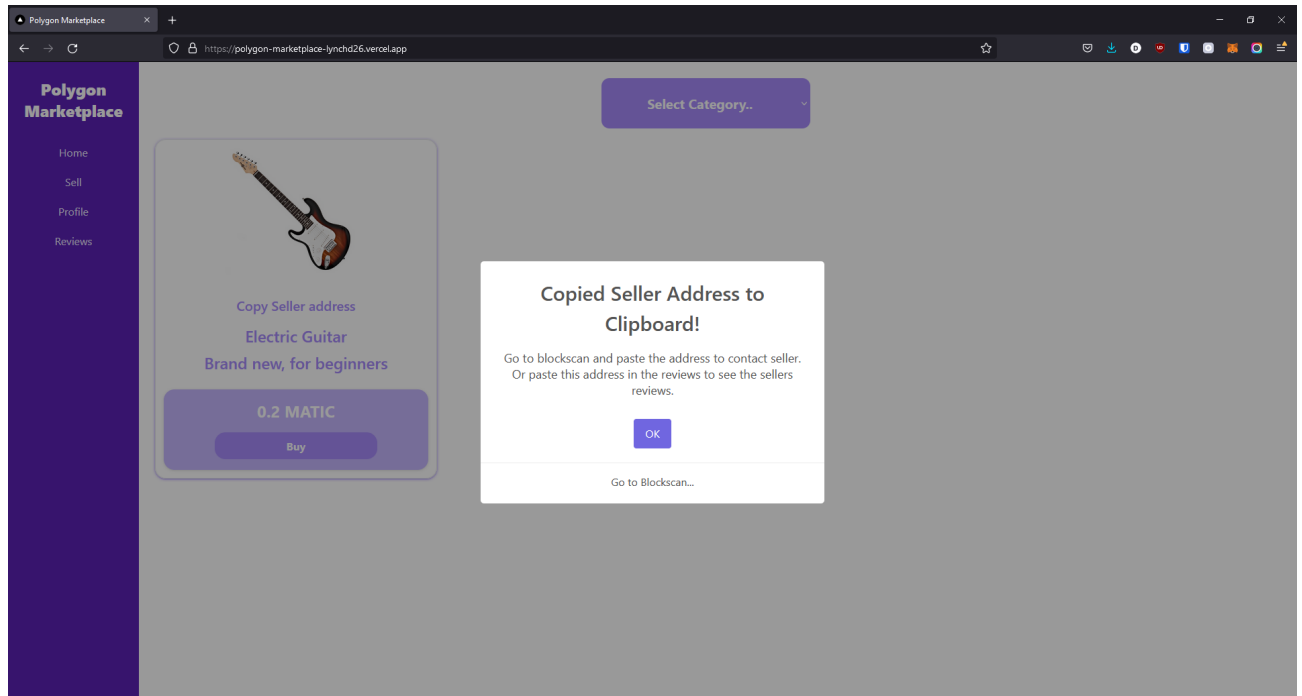

If there is an item listed in the category you have selected it will be displayed like below. The listing consists of an image of the item, a button to copy the wallet address of the seller, the name of the item, the description of the item, the price of the listing and finally a button to purchase the item.

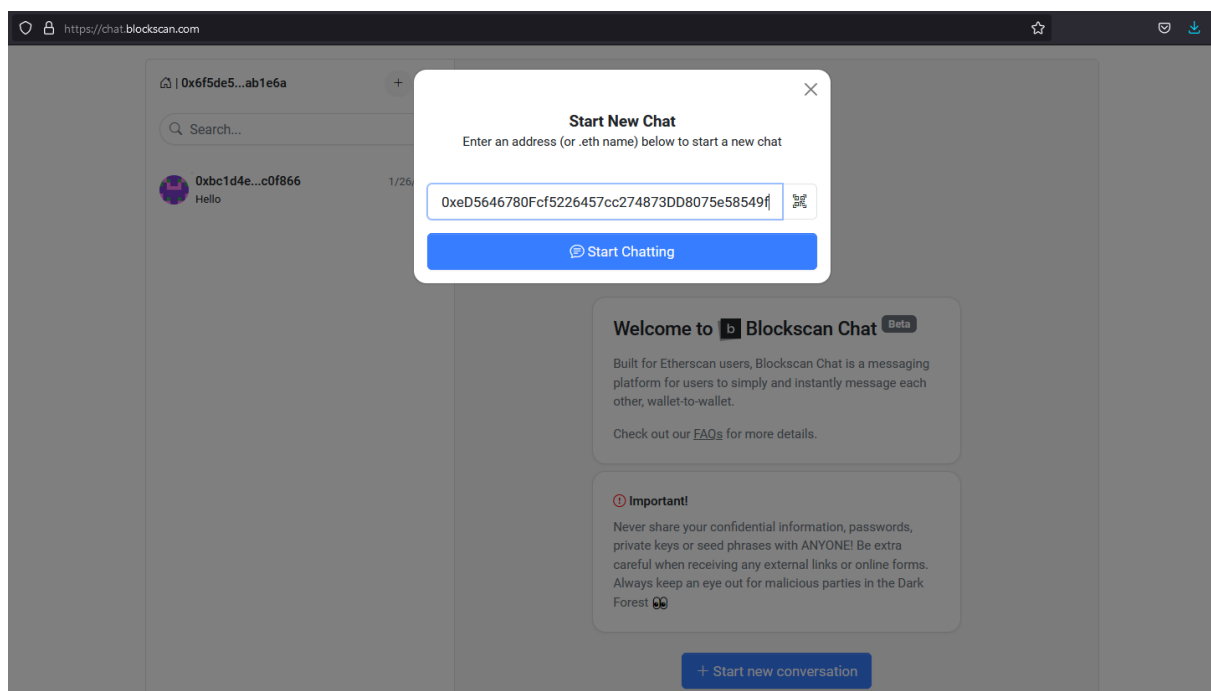

## 5. Messaging a seller

If you see an item you are interested in and would like to send the seller a message about the item simply click the “Copy Seller Address” button shown on the advertisement.

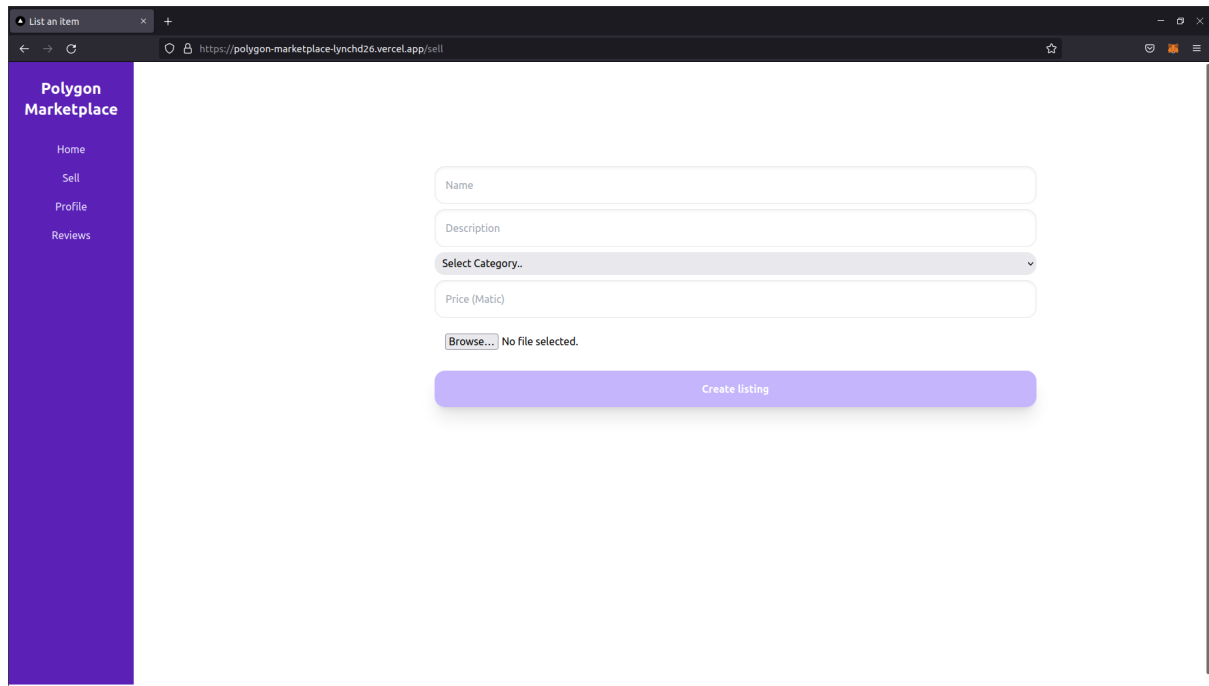

When you click on the button you will see the above pop up. The wallet address of the seller will be copied to your clipboard. Simply click go to blockscan and you will be able to paste the address in the box as shown below to open a chat with the seller who will then be able to see the messages you send them.

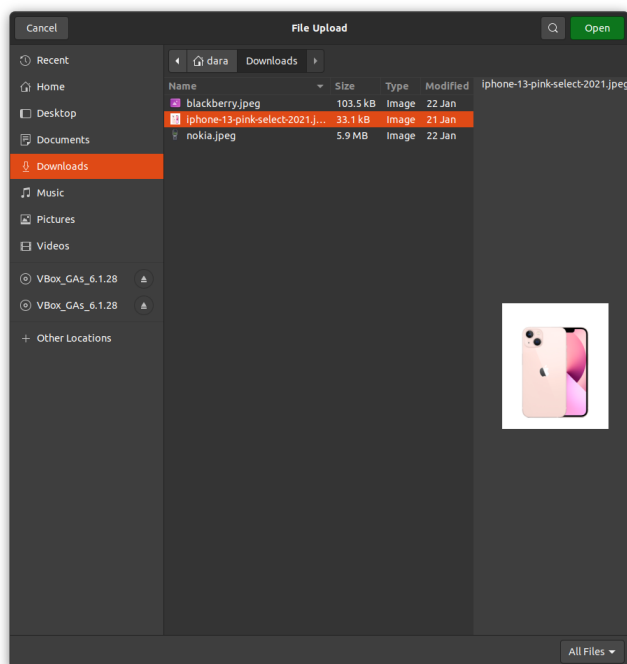

## 6. Listing an item for sale

In order to list an item navigate to the 'Sell' page from the sidebar. You will see a number of input boxes which allows you to enter the details of your item and it's price. All of these fields are required to list an item. If any fields are left blank, the site will not allow you to create the listing until you have done so.

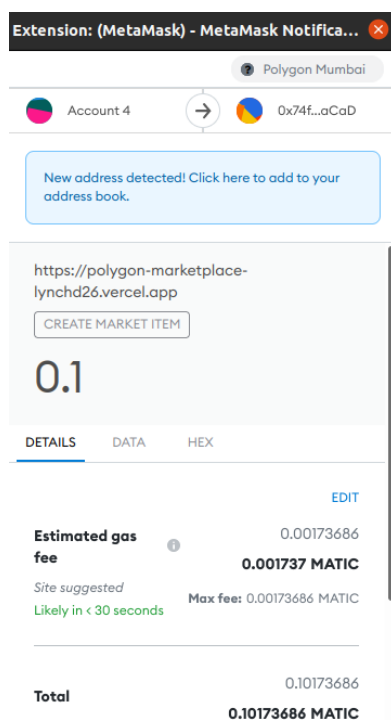

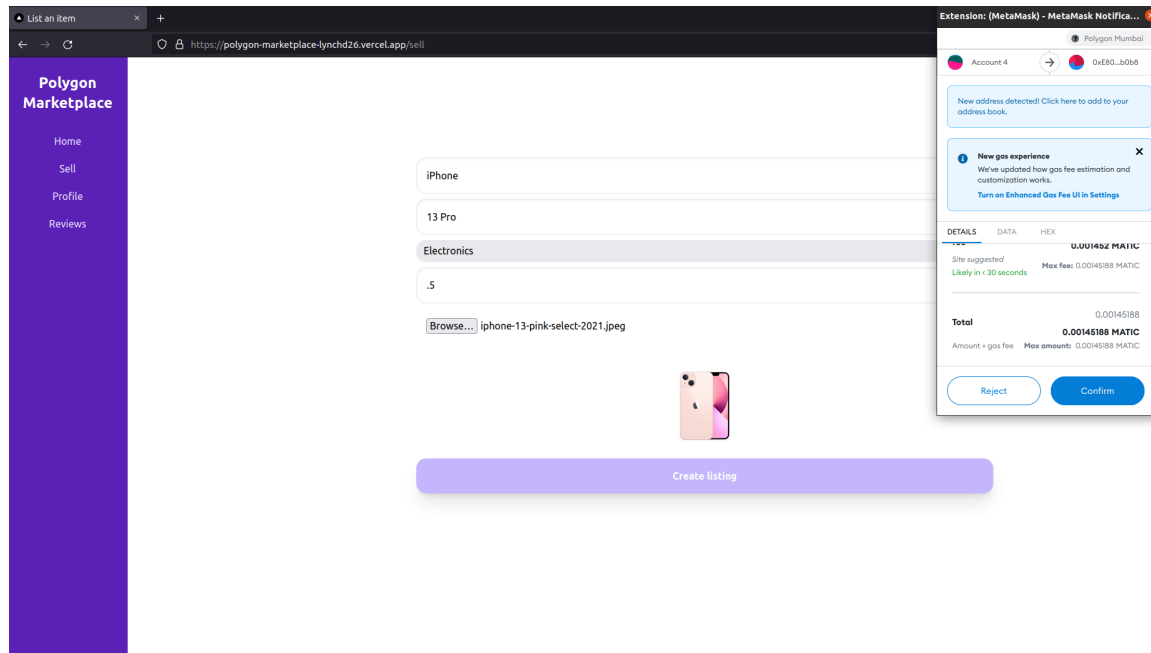

The screenshot shows a web browser window with the URL <https://polygon-marketplace-lynchd26.vercel.app/sell>. The page has a purple sidebar on the left with the text 'Polygon Marketplace' and navigation links: Home, Sell, Profile, and Reviews. The 'Sell' link is highlighted. The main content area contains a form with the following fields: 'Name', 'Description', 'Select Category..' (a dropdown menu), and 'Price (Matic)'. Below these fields is a 'Browse...' button with the text 'No file selected.' and a large purple 'Create listing' button at the bottom.

You need to provide an image of your item. When you click the browse button, your file explorer will open where you then need to navigate to and select the image you want to use.

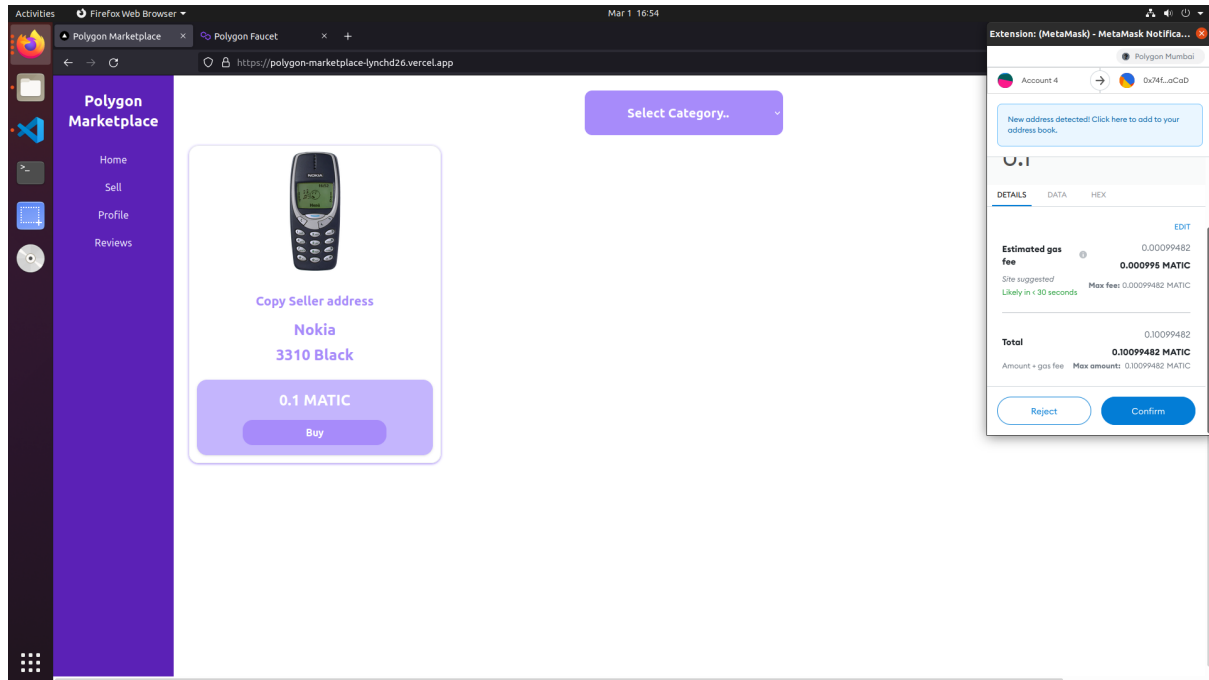

Once you have entered all the fields and uploaded an image, you can click the 'Create Listing' button. When you do this your Metamask wallet extension will open automatically. It will show the gas fee required to create this listing.

Once you have confirmed the transaction to create the listing, your metamask wallet will open again. This transaction will post your listing on the marketplace. There is a listing fee which will be charged in this transaction. You will be able to see the listing fee in the transaction details on your Metamask wallet. Once you click confirm on this transaction, your item will then be posted to the marketplace where anyone can view and purchase it.

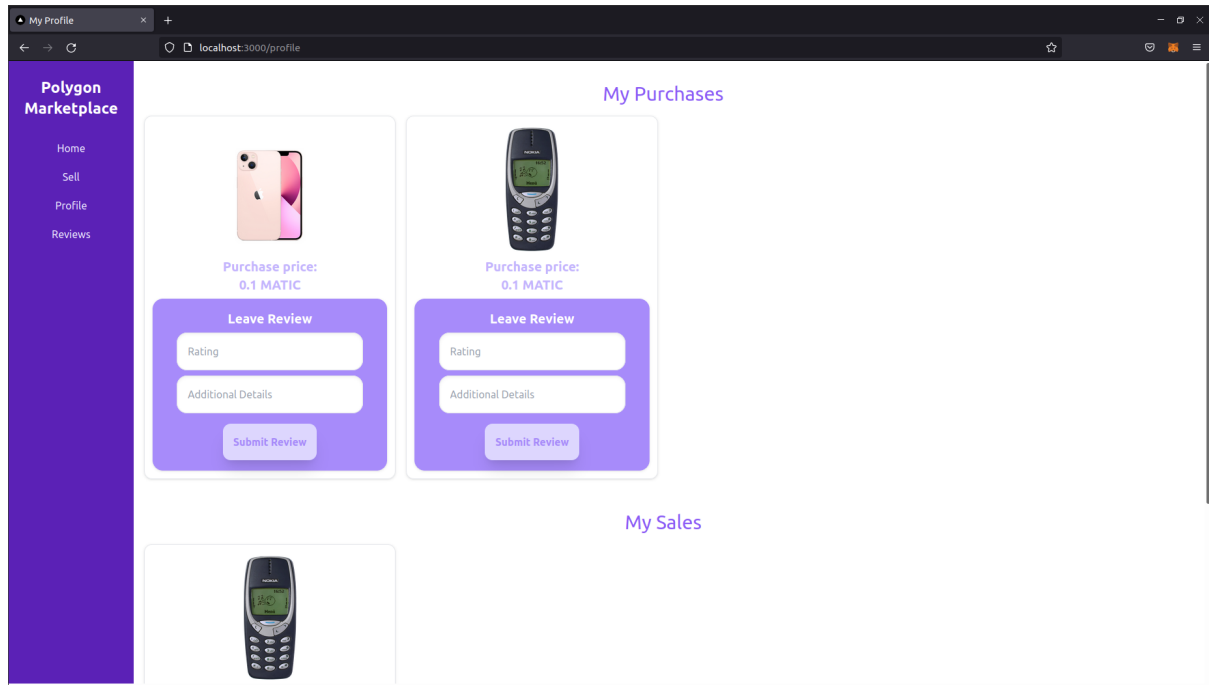

## 7. Buying an item

To view the items that are listed for sale, navigate to the 'Home' tab. This will show sale items along with their price and a button to purchase the item. When you click 'buy' the metamask wallet will appear and show the price you need to pay to purchase the item which includes the listed price and the gas fee. Once purchased you will see your purchase in the 'Profile' tab under 'purchases'.

## 8. Viewing your purchases and sales

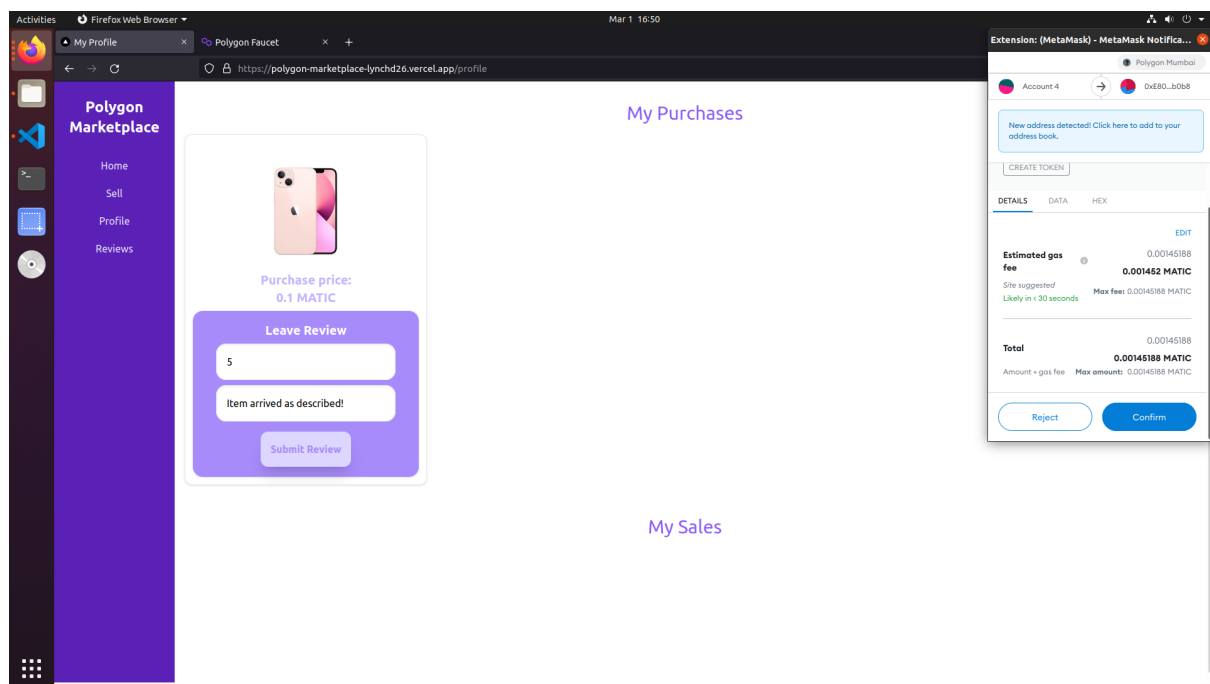

After you have completed any sales or purchases these will be shown in the *'Profile'* tab. The price at which the item was purchased is visible and also the option to submit a review.

## 9. Leaving a review

In order to leave a review after you have made a purchase, navigate to the '*Profile*' tab. You will see the items you have purchased. Enter the rating you would like to give the seller from 1 to 5 and a short description of how their service was and click submit review. Your metamask wallet extension will pop up and ask you to confirm two transactions, the first being to create the review token and the second to post the review to the marketplace. Unlike when you are listing an item for sale, there is no listing fee for posting a review, the only cost is the gas fee of the transaction which is generally a matter of cents or less.

## 10. Viewing and searching reviews

When you click the 'Reviews' tab on the sidebar you will be taken to the page shown below. Reviews will be shown here displaying the wallet address of the user who is receiving the review as well as the item which was reviewed. When on the home page you can click the 'Copy seller address' button which adds the seller's wallet address to your clipboard. You can then paste that address into the search bar which is found on the reviews page to check if that seller has any previous reviews and view them.

### Reviews
